

Robert Watson Series Door Handles

The Robert Watson Collection of door furniture consists of three lever designs and a range of complementing escutcheons, turnknobs and emergency release sets. The roseless design of the furniture is unprecedented and the innovation and lateral thinking involved in the development of the products has led to them being patent protected and design registered.

Application

The Robert Watson range is suitable for commercial as well as residential use.

It can be fitted with:

- Lockwood Selector 3770 Series Mortice Locks
- Lockwood Synergy 3570 Series Mortice Locks
- Lockwood 6780 and 6580 Mortice Locks (38mm backset, metal doors only)
- Lockwood 531 Latches and 6260 Tubular Bolts

Fixing

Furniture is fixed to Selector 3770 or Synergy 3570 Series Mortice Locks using a specially developed pair of steel adaptor plates that are secured through the lock case using screws.

Robert Watson furniture may also be fitted with a Lockwood 531 Latch using a steel adaptor which locates over the body of the latch.

A special adaptor for fixing Robert Watson furniture to 6780 and 6580 Narrow Style Mortice Locks in hollow aluminium door sections is also available.

Robert Watson Series Escutcheons

These escutcheons are designed to be fitted with Lockwood oval cylinders and the Robert Watson range of turnknobs and emergency turns. Fitted using a grub screw, they ensure that the accessories they are fitted with are aesthetically pleasing.

Use with Lockwood Mortice Locks and 6260 Bolts. The escutcheons are available in different sizes for suitability to different door thicknesses.

Note: Escutcheons must be ordered separately for use with oval cylinders, turnknobs and emergency release turns.

Escutcheons
