## Standard Finishes

Black 17

TP

## Non Standard Finishes

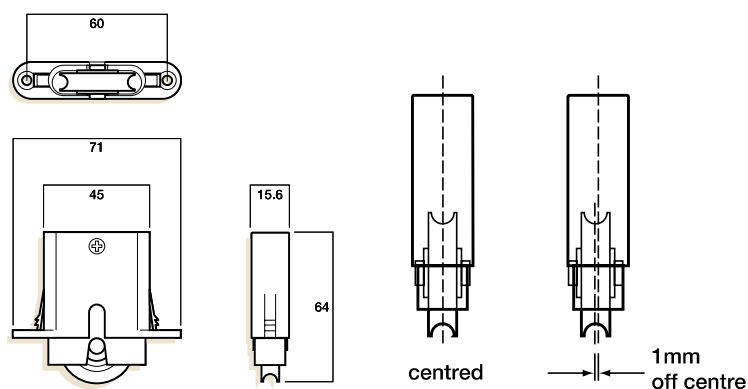

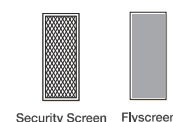

Not available in other finishes.

## Accessories

No accessories are available.

☒ Aluminium

### \*Offset Wheel Function

To offset the door in order to reduce scraping or clashing with another door panel simply remove only the roller from the unit, rotate it 180 degrees, then replace it back into the unit. This will offset the panel or door 1mm.

**Note.** If the offset is incorrectly placed remove the entire unit, rotate it 180 degrees and then replace the entire unit.
